#### **DETAILED ACTION**

### Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3, 5-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Grover et al. (US 5,759,917.

Grover et al. discloses a method of chemical mechanical polishing (CMP) using a slurry containing cerium oxide (Col. 4 lines 40-45). The slurry also contains an additive (i.e. a modifier) comprised of a carboxylic acid. The method is disclosed as useful for STI (shallow trench isolation). STI is discloses in Col. 1 lines 25-37 as follows: silicon nitride is deposited over a thermal oxide; a shallow trench is etched; a layer of oxide is deposited over the into the trench; the excess oxide is polished using CMP such that the surface is planar (i.e. the high spots are removed and the low spots are essentially untouched. In Col. 5 lines 60-63 the percentage of the metal oxide abrasive is disclosed as from about 2-25 % by weight. In Col. 7 lines 40-53 is described the methods of the enclosed Examples including the down force of 9 psi.

#### Claim Rejections - 35 U.S.C. § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 4, 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grover et al. as applied to claims 1-3, 5-6 above, and further in view of Burke et al. (US 5,934,978).

Grover et al. discloses a CMP method using ceria slurry as disclosed above.

Grover et al. does not disclose the use of ethylene glycol in such a slurry.

Burke et al. discloses in Cols. 3 and 4, lines 60+ and 1-9, respectively, the addition of a suspension agent which improves the colloidal behavior of the abrasive particles in deionized water and inhibits the coalescence of the particles. Ethylene glycol is disclosed as a suspension agent. In col. 4 lines 9-15, ceria (i.e. cerium oxide) is disclosed as the abrasive particles in the slurry.

It would have been obvious to one of ordinary skill in the art at the time of the present invention to combine the references cited because Burke et al. brings to Grover a suspension agent (ethylene glycol) that would increase the utility of a ceria-based CMP slurry and such a combination would have been anticipated to produce this expected result.

Application/Control Number: 09/270,606

Art Unit: 1765

It would have been obvious to one of ordinary skill in the art at the time of the present

invention to optimize the amount of ethylene glycol in such a slurry because the addition of

ethylene glycol in a ceria-containing CMP slurry to affect the suspension and ultimately the

polishing of the slurry was known, such optimization would have been anticipated to produce an

expected result, and such optimization would have been achieved with only routine

experimentation.

Any inquiry concerning this communication or earlier communications from the examiner 5.

should be directed to Matt Anderson whose telephone number is (703) 308-0086. The examiner

can normally be reached on Monday-Thursday from 6:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are not successful, the examiner's

supervisor, Benjamin Utech, can be reached at (703) 308-3836.

Any inquiry of a general nature can be directed to the group receptionist whose telephone

number is (703) 308-0661.
